

SYSTEM INSTALLATION

Flush pipes thoroughly before installing the the shut off valve.

Set the shut off valve respecting the minimum and maximum distances of the depth according to the wall and shown at the picture below.

Connect the inputs and outputs of water as shown in the drawing.
In case you weld the pipes to the shut off valve make sure to the remove the ceramic valve before heating the body.

If you have removed the components to weld the pipes to the system, reinstall with care not to damage them.
